Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11-01-05 has been entered.

Response to Amendment

Applicant amendment of 11-01-05 amended claims 1, 2, 4 – 6, 9 – 10, 13 – 15 and 18 and canceled claims 3, 7, 11 and 16 - 17 as well as traversed rejections of Claims 1 - 18. As a result of amending the claims and upon further consideration, a requirement for restriction has been determined, which follow:

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 2, 4 and 18, drawn to a digital distribution method comprising receiving an order for content, incorporating the content for transmission and sending the product to an address specified before a predetermined period has elapsed, classified in class 705, subclass 26.

- II. Claims 5, 6 and 8, drawn to a method digital distribution method comprising, providing a browsing of products, receiving a selection for content, transmitting the incorporated content and sending the product to an address specified and ensuring the product arrives at the address in a predetermined period, which is based on the predetermined time from the time the order is received, classified in class 705, subclass 59.
- III. Claims 9, 10 and 12 - 15 drawn to a method and system with browser for browsing a plurality of products and allowing the buyer to specify a desired delivery period; incorporating the content and transmitting the content and sending the product as well as the availability period of the transmitted content based the delivery period being longer that the desired delivery period or a required delivery period based on shipping charge, classified in class 705, subclass 27.

Inventions Groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group II has separate utility such as a method digital distribution method comprising, providing a browsing of products, receiving a selection for content, transmitting the incorporated content and sending the product to an address specified and ensuring the product arrives at the address in a predetermined period, which is based on the predetermined time from the time the order is received. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Inventions Groups I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group III has separate utility such as a method and system with browser for browsing a plurality of products and allowing the buyer to specify a desired delivery period; incorporating the content and transmitting the content and sending the product as well as the availability period of the transmitted content based the delivery period being longer than the desired delivery period or a required delivery period based on shipping charge. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Inventions Groups II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group III has separate utility such as a method and system with browser for browsing a plurality of products and allowing the buyer to specify a desired delivery period; incorporating the

content and transmitting the content and sending the product as well as the availability period of the transmitted content based the delivery period being longer that the desired delivery period or a required delivery period based on shipping charge. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
